**Walinga
Bulk Feed Bodies & Grain-Vacs**

www.FarmRanchDairy.com

HARDEST WORKER ON THE FARM.

OUR 7816 DLX provides you with maximum loading capability. With 12 feet of suction hose and a truck loading kit, it can easily move 5500 Bu/hr of corn or barley. At the heart of all this power is Walinga's SRT Sound Reduction Blower and our 2018 Super hardened airlock. The 7816 DLX comes with accessories. See Walinga.com for complete details. Walinga has been building tough reliable equipment for over sixty years which is why farmers agree; for performance and durability, a Walinga Vac is tough to beat in the long run.

AUTOMATIC BOOM HEIGHT CONTROL

FOR NEW AND USED PULL TYPE &
SELF-PROPELLED SPRAYERS

WORK FASTER, SAFER & SAVE

Durable, Compact Stainless Steel Housing;
Sealed Weatherproof Sensor

- Save the operator; much less fatigue & stress
- Save time in the field; work faster
- Save the booms; reduce impact with ground & crop
- Save chemical; reduce drift and spray on target
- HEADLAND MODE! Safeguards booms during sharp turns

COMPLETE SYSTEMS FROM JUST \$4840!

FEATURES:

CHOOSE FROM 3 OPERATING MODES:

- Bare Ground • Partial Canopy • Full Canopy

ISOBUS COMPATIBLE OPTION:

Less cab clutter. Easier menu system.

SMART SELF-CALIBRATION:

Automatically adjusts to the sprayers' hydraulic performance.

LONG RANGE SENSORS:

Choose from 2-5 sensor systems

- Fits ALL sprayers with electric-over-hydraulic controls
- Few components, works with existing valves - DIY install

SPRAYING COMPONENTS

Stukenholtz Laboratory Inc.

Celebrating 50 Years of Agricultural Testing

In 1970, there were no commercial soil and plant testing laboratories in Idaho. Farmers applied fertilizers based upon educated guesswork. Dr. Dale Stukenholtz and his wife Joyce saw an opportunity to build a business and started a soil and plant testing laboratory and field consulting service based in Twin Falls, Idaho. Dr. Stukenholtz had an unusually diverse background as an educator at the University of Nebraska, an agronomist in the fertilizer industry, and a farmer, and he saw a need for more modern fertilizer recommendations to produce greater yields at less cost. His clients were the growers, so he could make unbiased recommendations that maximized economic return to the farmer. After extensive field research, he developed these improved fertilizer recommendations that quickly became popular with growers and form the basis for nearly all fertilizer applications in the intermountain west area. Stukenholtz Laboratory clients include growers from all neighboring states and several foreign countries including Australia, Canada, Egypt, Russia, Mexico and New Zealand.

Stukenholtz Laboratory provides 1 to 2 day service, including picking up and delivery time, across Southern Idaho from St. Anthony and Grace to Parma and Homedale. Results can be delivered, mailed, faxed, or pulled from the Laboratory's webpage: www.stukenholtz.com. To improve their service, Joyce and Dale Stukenholtz expanded the laboratory 23 years ago, installed the latest in computerized instrumentation and quality control, and made it the most modern and well equipped agricultural laboratory in their market area.

Critical to the success of Idaho's most efficient laboratory and largest field consulting firm has been its personnel. Dr. Stukenholtz has had a PhD in Soil Fertility and Plant Nutrition since 1964 and his son and Laboratory Manager Paul has nearly completed his own. Consulting agronomists include

J.P. Kruckeberg of American Falls, a 41 year veteran of field consulting and the most successful single agronomist in the state, and Bart Kunz. The Laboratory and office staff are equally good.

Analysis room at Stukenholtz Laboratory Inc.

Stukenholtz Laboratory continues with research and improvement. In conjunction with the Idaho Crop Production Association and University of Idaho CFEP research project, Stukenholtz Laboratory has helped to ensure that fertilizer recommendations in Idaho are the most cost efficient possible and produce the maximum economic yield while protecting the environment. Stukenholtz Laboratory personnel have conducted field research on over 40 different products and continue to be the experts at "cutting edge" agricultural technology. As we end our first 49 years of business and begin our next, we would like to thank our current and former employees for their dedicated work and our customers and clients for their years of support.

Kuchar All Crop Progressive Concaves

Kuchar Progressive Concaves progress in width for better separation and practically eliminate Rotor Loss. Kuchar Progressive Concaves allow you to run wider with more rotor speed. They also eliminate build-up in the concave for more capacity, a cleaner sample in the

bin, and less grain on the ground. A set of Kuchar Concaves has 672 square inches more opening in the thrash and separation area than a set of John Deere Concaves.

Kuchar Progressive Concaves are also made for Case IH, New Holland, and Massey Ferguson Combines.

KUCCHAR

HIGH PERFORMANCE PARTS INC.

JOHN DEERE KUCCHAR JOHN DEERE

← **Concaves:** The STS concaves allow you to run wider with less rotor speed while giving you a cleaner sample in the bin. It eliminates build up so the concaves stay clean for more capacity.

Kuchar ALL CROP Concaves and separating grates are available for all 50, 60, and 70 series John Deere, Case-IH 14-23 series and 7010/8010. Kuchar concaves are also available for New Holland and Massey.

Rotor: Stops the rotor loss with a cleaner sample in the bin and it pulls easier to use less fuel, with more acres per hour and more money in your pocket.

← **Discharge Beater / Acceleration Beater:** Takes the material off the rotor faster. Feeds the straw chopper more evenly for a wider and better spread behind the straw chopper.

Walinga

Bulk Feed Bodies & Grain-Vacs

From concept, design and through production, Walinga meets the customer's needs at every step. Creating outstanding products that are innovative and durable, with some client's vehicles being passed from generation to generation.

Walinga is a leading North American manufacturer of transportation equipment and portable pneumatic conveying systems for grain, feed, seed... virtually any dry bulk material. Walinga is still a family owned and operated company. The total commitment to quality is not only our inheritance - it's our foundation for the future.

Walinga products represent the best in manufacturing excellence. Our in-house engineering and design teams utilize the most current

computer technology available. State of the art equipment, combined with over 60 years of experience, ensures that our customers receive unsurpassed quality.

Comprehensive engineering capabilities allow us to offer sizes, capacities, features and options that are specifically job-matched according to individual requirements. The services of our Engineering Department are available to our customers to assist in the selection of the properly specified chassis. Every Walinga vehicle is designed and produced to best fulfill its designated function.

Custom-built aluminum feed bodies and trailers, pneumatic conveying systems, recycling trucks and bodies, aluminum and steel dump bodies... each built according to exact standards.

Every stage of the manufactur-

ing process from design to completion is performed by Walinga. The result - a cost effective, durable product line that responds to any challenge with premium.

Walinga Agri-Vac

The only system you'll ever need. Gives one-person total grain-handling capability! Do it all with the Walinga Agri-Vac. Fill or empty storage facility being used. The Walinga Agri-Vac puts an end to legs, augers, sweeps and shovels. Grain handling has never been simpler, safer or healthier.

Just couple the Agri-Vac to your tractor and drive into position. Lightweight vacuum/pressure hoses attach in seconds and flex easily. Suddenly even tight spots and awkward angles are no problem!

Bulk Feed Trailers and Bodies

Walinga Inc. has been manufacturing bulk feed transportation equipment for more than 60 years. In this time we have become committed to an ongoing program of research and development. In response to the increasingly diverse needs of our customers Walinga is and will continue to be on the forefront of technological evolution.

The options and features of the Walinga Bulk Feed Delivery Units are numerous. Walinga Bulk Feed Delivery Units can help you in your quest to increase production, performance, and efficiency.

Meet the all-new Bale Baron 5250!

Building on the original design principles that Bale Baron owners appreciate, the new 5250 models feature many impressive upgrades designed to improve productivity and serviceability while still maintaining the outstanding reliability the Bale Baron brand is all so well known for. This year Marcrest Manufacturing Inc released 2 new models; the all-new 5250 and the refined 4250. Both of these units are available in the P (pick-up) and T (trail) models. The 5250 has a hydraulic requirement of 40 gallons per minute while the 4250 requires 30 gallons per minute.

Let's walk around the 5250 and see what fantastic upgrades have been made. At first glance you can immediately notice the wider front stance and wide flotation rear tires which keep the 5250 firmly planted. You will also see that the body work has been completely remodeled and looks fantastic! The ladder has been conveniently attached on a generous angle allowing for safer climbing to the knotter. Upon opening the knotter cover the relocated and re-engineered knotter miss-tie sensors cannot be missed; the new sensor location is a sure-fire way to detect actual knotter miss-ties. Another upgrade to the already extremely reliable low maintenance Rasspe knotter is the 4-lobe knotter sprocket which reduces the knotter cycle time by 25%! After the easy climb down the angled ladder you will notice the massive twine boxes, which swing out to allow full exposure to the compression chamber

and hydraulic lines for inspection and maintenance purposes. While walking around the 5250 one can easily notice that there are no grease nipples on all pivot points; this is achieved by using nitride treated pins paired with composite bushings. This design has been proven and adopted from the 6240 self-propelled Bale Baron. A serious feature that has not been mentioned is the ISOBUS compatible PLC. What does that mean? It means that if your tractor has ISOBUS the 5250 can be fully controlled and monitored right from the seat in your tractor! Ahh, no, my tractor doesn't have ISOBUS?... No worries, there are ISOBUS screens available from Marcrest! And for those who aren't into the latest and greatest technology, the 5250 can easily be operated by our ever-proven standard cab control box.

Now let's take a quick look at the 4250. It has maintained the same body work and stance as the 4240/4245. However, it shares some of the fantastic upgrades mentioned on the 5250 such as the greaseless pivot points thanks to the nitride treated pins and composite bushings. It also has the new 4 lobe knotter sprocket on the low maintenance Rasspe knotter for faster tie cycles. And like its big cousin the 4250 also has the new ISOBUS compatible PLC which means ISOBUS connectivity is ready and available for the 4250 when you are.

For more information please contact your nearest dealer or visit our website: www.marcrestmfg.com

5250 | BIG PRODUCTION JUST GOT BETTER

INTRODUCING THE NEW BALE BARON 5250!

Catch A Ride On The Feed Train®

In his previous career, before becoming a manufacturer, Bob Lutz was a cattle farmer. As such he was always looking for ways to save time and money and make life a little easier. Since he was running a rotational grazing system to conserve his pastures, he was spending a lot of time moving feed bunks. Thus the dream of the time and labor saving mobile feed bunk system came into existence.

In order for this system to work properly a special steering mechanism was necessary to cope with the hilly terrain here in northern Missouri. Bob kept experimenting until he came up with the correct formula and put it into action for his own use. He then applied for and was granted a patent on the steering system.

The high quality construction of the Feed Train® mobile bunk led to requests for stationary bunks of the same quality and those were added to the

product line. Next we were receiving customer requests for creep feeders and these were designed so that no tools are required for set up, thus avoiding the "lost screwdriver syndrome."

Customer requests for bulk bin storage followed and two sizes in portable bulk bins were developed – a 1.5-ton bin and a 3-ton bin. These sizes are also available as stationary units as well as a 5-ton bin. These bulk bin products are also used as seed tenders. And since most cattle farmers now use ATV or UTV units in their operations we have created units for feeding from the seat of your vehicle.

Pull-behind units come in 500- and 1000-pound capacity. And the UTV unit that sits in the back of the vehicle holds 600 pounds. Scales are available for any of these units.

Take a look at our website at www.FeedTrain.com or call us at 888-592-2351 for additional information or to find a dealer near you.

Ocean View Ranch Alpacas

Ocean View Ranch is a family owned and operated alpaca ranch serving the northern

Francisco International Airport in the beautiful Santa Cruz coastal mountains.

At Ocean View Ranch we are dedicated to improving the quality of our alpaca offspring by breeding to world class herdsires with proven pedigrees. The results of our breeding plan are apparent with each generation. Our alpacas truly represent superior fiber, conformation and temperament.

We welcome your inquiry into our award winning alpacas. For more information, please feel free to call Denise Moles at (831) 325-9441 or e-mail her at MrsMoles@aol.com. We look forward to assisting you in fulfilling your alpaca dreams.

DISCOVER THE PLUSES, INCLUDING
SUPERIOR BALE DENSITY AND CAPACITY.

BIGBALER
+PLUS

A NEW WORLD DEMANDS NEW HOLLAND.

New Holland's full line of BigBaler Plus large square balers create dense, well-shaped bales. The new bale chamber is 31.5 inches longer to create bales that are up to 10% more dense, and the headland detection system helps maintain density by eliminating the load drop when the plunger is inactive during headland turns.

- Softer bale drop and less twine breakage in the heat of the day results from the extended bale chamber
- Easier cleaning from the larger service platform
- The right model for you, with the choice of three bale sizes, available crop processing, and tire/axle combinations for any terrain

Learn more about New Holland's lineup of BigBaler Plus large square balers at www.newholland.com/na
